

YOUR COCOA SNAPSHOT

Chocovic
activity report in 23/24

Everything we do at the Cocoa Horizons Foundation is impact-driven. That's why full transparency is vital.

And so is your commitment to our program.

This personalized Cocoa Snapshot outlines the impact your contribution is having on cocoa farming communities across the three pillars of our work. The data is calculated on a pro rata basis according to the premium you paid to us.

Prospering Farmers

We focus on a number of key enablers so farmers can improve their livelihoods through higher investment on farms and increased income. This is the difference your contribution made:

3732 farmers benefited from our Farm Services activities below. Through our Farm Services, we provide farmers access to a farm diagnosis, planting materials, labor support and coaching to improve productivity and increase income.

2754 farmers received a Farm Business Plan. Based on a diagnosis of the farm by field staff, the farmer receives recommendations on how to increase the cocoa yield.

1233 farmers were supported with a Productivity Package. This consists of high quality agricultural inputs and individualized coaching services provided by field staff.

893 hectares of farmland were supported with pre-harvest interventions including pruning and input applications provided by trained labor teams.

67% farmers are above the poverty line (World Bank's International Extreme Poverty Line of 2.15 USD per day).

52030 cocoa seedlings were distributed.

Empowered Communities

We work to enable systemic and lasting change on child protection and human rights by strengthening our community-centric approach. Your contribution resulted in the following:

54 VSLAs. VSLAs are Village Savings and Loan Associations. These community associations enable members to pool savings and raise resources to create their own business or fund household needs like school fees. Through financial independence, women are empowered to make decisions that affect their children and build resilience.

71% members of VSLAs are women.

293 cases of child labor were identified and **860** cases are being remediated. Remediation activities depend on the severity of the case and can include, among other activities, awareness-raising sessions, the distribution of school kits and the delivery of birth certificates.

601 children no longer in child labor.

1155 farming households participating in child labor surveys.

1803 children participating in child labor surveys.

100% farmer groups being covered by child protection systems and remediation activities.

Thriving Nature

We focus on ensuring deforestation due diligence and carbon removals through low carbon farming practices. Your commitment resulted in these achievements:

511 hectares of farmland are under management with agroforestry - where other crops are integrated with cocoa trees according to local geophysical and social conditions. The farms are monitored annually to track progress. The farmers receive a payment for their environmental services based on tree survival rates. Agroforestry also enables the reduction of pests and diseases, the promotion of biodiversity and an additional source of income for farmers while capturing carbon.

91% farmers delivered cocoa with all plots mapped. Farm mapping ensures no cocoa is coming from protected areas.

38439 shade trees were distributed to farmers.

88% of Horizons cocoa which is proven to be free from deforestation.

6366 tons of carbon were sequestered through all these environmental activities.

Thanks to your commitment to Cocoa Horizons, you're helping us scale impact and drive positive change in cocoa farming communities.

*Your support is expanding horizons.
Thank you for being part of our story.*

By partnering with the Cocoa Horizons Foundation, you support the Sustainable Development Goals: <https://www.un.org/sustainabledevelopment>
